

## OVERVIEW

- “Sandwich Effect” is when Econokore is attached to both sides of another bending panel.
- For this example, we will be using Econokore and bendable plywood.
- Econokore will cover all plywood imperfections, providing a smooth, paint-grade surface.

## PRO TIP:

Econokore’s face may be covered using a wide variety of materials including laminates, veneers, metals, leathers, and similar semi rigid materials.

**For an indepth guide to Econokore lamination, check out our Video Tutorial:**

## Let’s get started!

1.

Requires two sheets of Econokore and a bendable panel for in between.

2.

Apply PVA/Wood glue to both sides of the bendable panel or the back side of each Econokore panel.

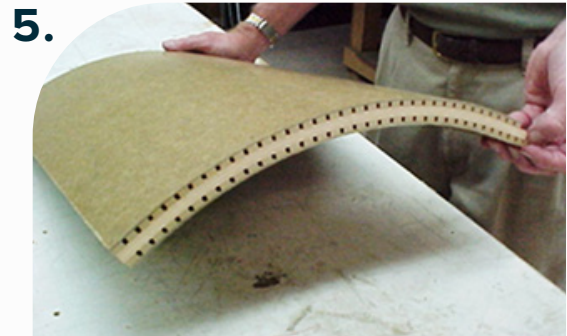

3.

Align panels over the form for pressing.

Use a Vacuum Press or Straps to hold the shape until the glue has dried.

Results.

**Congratulations!** Your project is complete, but this is just the beginning of opportunities with our Kerfkore products.
